

## Polystar Specifications

**Product Name:** Polystar TumbleWood

**Product Application:**.....Playgrounds, Walking & Jogging trails, Outdoor Landscapes

**Sub-Base Material** .....Not Significant

**Playground Material**.....Non-toxic wood chips, low splinter content, no coloration. ASTM, ADA Certified for fall height of 12' when applied at least 12" thick.

**Forest Blend** .....From selected green trimmings amended with fir wood. More woody texture than Mulch. Apply 3" to 6" deep.

**3/8" Minus Sawdust** .....From fir and other wood feedstocks. A nursery product and bulking agent for plants.

**2" Overs** .....From fir and other wood feedstocks. For weed suppression and moisture conservation.

**Designer Woodchips**.....For landscaping and erosion control, dyed with a non-toxic material (EPA approved). Excellent weed suppression and moisture retention.

**Designer 50/50 blend** .....Designer Woodchips blended 50/50 with Forest Mulch.

*Delivered in clean, modern trucks with installation equipment if requested.*

All Polystar Systems comply with the requirements of:  
 : Consumer Product Safety Commission.  
 : American Disabilities Act

### Characteristics:

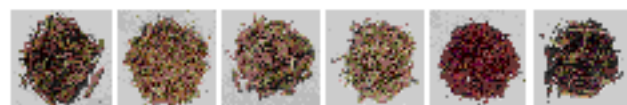

**TumbleWood** provides a non-toxic, low splinter, low dust, minimal contamination, and normally fungus free ground cover.

Playground chips are ASTM 1292-99 and ADA Certified when applied to a depth of 12" - maximum fall height 12'.

No toxic or hazardous leachates present.
